INFANT RESEARCH STUDY: ELIAS

12–18-month-olds

We are looking for infants 12-18 months old to participate in a new study occurring at UIUC—Early Life Influences on Attention Study (ELIAS). The study is focused on the relationship between infants’ eating and their cognitive and motor development over time.

If you choose to participate, you will be asked to come to six in-person visits throughout 12 months’ time. Two visits at the start, two visits six months later, and a final two visits 6 months after that.

More information, eligibility, and scheduling can be done by directly contacting our study at elias.uiuc@gmail.com
STUDY FOR INFANTS RECEIVING WIC BENEFITS

Infants Receiving WIC Benefits 12-18 months

We are looking for infants 12-18 months old receiving WIC benefits to participate in a new study occurring at UIUC—Early Life Influences on Attention Study (ELIAS). The study is focused on the relationship between infants’ eating and their cognitive and motor development over time.

If you choose to participate, you will be asked to come to six in-person visits throughout 12 months’ time. Two visits at the start, two visits six months later, and a final two visits 6 months after that.
